# Hacking with echoAR

[echoAR](#) is a cloud platform for augmented and virtual reality (AR/VR) that provides tools and server-side infrastructure to help developers & companies quickly build and deploy 3D apps.

We are excited to offer this sponsorship package to HackOff v3.0 and to participants of your hackathon so they can benefit from a faster and simpler development process for AR/VR apps (including those aimed at solving COVID-19 related challenges. Read more about our response to COVID-19 [here](#)).

## How echoAR supports your hackathon

### Benefits to you

A sponsored challenge

Dedicated [registration page](#)

Media kit (graphics & content)
